

# NETZSCH

Leading Thermal Analysis

**NETZSCH** is a well known and acknowledged market leader for thermal analyzers worldwide and serves the Indian market via a subsidiary located in Chennai. The products on offer include DSC, TGA, DMA, TMA, TG/DTA/DSC (STA), DILATOMETER, LASER FLASH APARATUS, REACTION CALORIMETERS, REFRACTORY TESTING EQUIPMENTS, EGA evolved gas analysis (MS and FTIR coupling), DEA, HFM, GHP covering a wide temperature range of -260°C to 2400°C and above. Advanced software options like Thermokinetics and purity-determination, density thermal simulation component kinetics, Peak separation etc enhance the capabilities and extend the horizons even further. This practically covers all application requirements from polymer, rubber to high temperature composites and alloys in different fields like, defence, spare research, glass and ceramics etc. We also undertake contract testing for any of the techniques listed above.
