

Dionex – Company Profile

The Art and Science of Chromatography

Passion, Power, Productivity

We stand for passion in the science of chromatography, power in the technology behind our products, and productivity in the industries that shape the world. We pursue a strategy of diversity in our products, markets, and geographic locations, leveraging our technologies to ensure consistent progress. Our customer focus is deeply rooted in technological strength and leadership. Solutions are at the heart of everything we do.

Leadership through Innovation

From our watershed introduction of Ion Chromatography (IC) more than 30 years ago to our Reagent-Free™ IC (RFIC™) systems, our IC developments set the state of the art. The latest offering from Dionex, RFIC-ER, received the prestigious R&D magazine's Annual R&D 100 awards. Dionex has led the industry in ion analysis for decades. Our broad portfolio of Ionpac® columns is regarded as the crucial chemical analysis solution to separate anions & cations and is recognized around the world for their excellence.

Continuing this legacy, we are delivering new breakthroughs that increase productivity in liquid chromatography (LC), with Intelligent LC (LCi) system solutions such as dual systems, Rapid Separation LC and Titanium LC. With introduction of award-winning Ultimate® 3000 System, Dionex takes HPLC technology beyond what was previously possible.

Industry leading Chromeleon® Chromatography Data System from Dionex is revolutionary itself. It provides rich, intelligent functionality with the exclusive benefit of operational simplicity. It powers new technologies and helps ensure regulatory compliance and optimal performance.

Dionex defines the leading edge of innovation in the separation sciences.

Dionex ASE (Accelerated Solvent Extractor) is a patented technique for the extraction of solid and semisolid samples. Extractions that normally take hours can be done in minutes. ASE generates results in a fraction of time also reducing solvent consumption drastically. ASE is approved for use by US EPA and CLP program.

Dionex India

Dionex (India) Pvt. Ltd. is the Indian subsidiary of Dionex. With a team of well trained professionals Dionex India is committed to provide innovative and quality solutions to the scientific fraternity in India. With a fully equipped support laboratory at our Navi Mumbai facility, we train and educate our customers to fully exploit our technologies to achieve higher levels of productivity. Dionex India operates through seven offices throughout the country to reach and support scientists nationwide.
