Spectralab is founded by Mr. Vishwas Kulkarni who is now Chairman & Managing Director of Spectralab Instruments Pvt. Ltd. With his degree in instrumentation, excellent career record and vast experience in this field he has been a source of inspiration. His keen interest in developing products of international standards & strong belief in 'Swadeshi' has put spectralab in select few organizations engaged in the manufacturing of analytical Instruments in India.

Spectralab Instruments Pvt. Ltd. is professionally managed & having infrastructure for production of multidiscipline complex analytical Instruments. The organization has a strong R & D base, facilities for developing electronic hardware & Software. It also has Application Lab for developing applications, optimizing analytical methods as per the intended use of the product. The analytical methods are of respective standards such as APHA, ASTM, USP, BP, IP etc.

Spectralab Instruments Pvt. Ltd. strongly believes in high quality standards of products & services offered. It has got all the facilities to conduct quality checks at every stage of manufacturing. Calibration / traceability is given for all the measurement parameters like temperature, volume, pH etc. The products are designed to meet GLP and other compliances.

We are now ISO 9001:2000 company
